

FEATURES

MHDD Shown

- **Stow Hard Drive Destroyer in EIA Rack**
- **Fits all Standard 19-inch EIA Racks up to 28-inches Deep**
- **Heavy Duty MIL Standard Slides Included**
- **Operator Friendly**
- **Saves Valuable Table-top Space**
- **1-Year Factory Warranty**
- **No Maintenance Required**

With the EIA Option both the BOW Model MHDD and MX2 Hard Drive Destroyers have a feature not offered by any other hard drive destroyer manufacturer - The ability to be operated and stowed away in any 19-inch EIA rack, thus saving all too valuable table-top space.

The destroyer is mounted to the sliding shelf by two heavy duty mount bars that replace the standard feet. The heavy duty MIL standard slides effortlessly glide in and out of the rack. Push buttons in the slides allow for quick removal of the shelf if ever necessary.

This option is perfect for use in military planes or vehicles, high production archival or media management companies, and more.

Requirements (EIA Rack Height):

For the MHDD Hard Drive Destroyer a minimum height of 26-inches (66 cm) is needed. For the MX2 Hard Drive Destroyer a minimum height of 30-inches (76 cm) is needed.
