

PROTON T-1.5 HARD DRIVE DEGAUSSER

An automatic, light-weight, drawer-style degausser that permanently erases data from hard drives and various tape media. It has an effective magnetic field of 1.5 Tesla, making it capable of sanitizing the highest coercivity media available today and it will continue to keep pace as hard drive technology advances. It is guaranteed to erase 3 Terabyte hard drives and tapes.

Specifications

Field Strength:	1.5 Tesla (15,000 Gauss)
Cycle Time:	Less than 5 seconds
Duty Cycle:	Continuous
Power:	Dual voltage automatically switches between 120V or 240V
Drawer Opening:	Accommodates all magnetic media within 1" x 4.3" x 6" (2.5 x 11 x 15 cm)
Weight:	48 lbs. (21.8 kg)
Dimensions:	12"H x 12"W x 20"L (30.5 x 30.5 x 50 cm)
Warranty:	One year unlimited parts & labor (extended warranty available)

Features & Benefits

- Meets US Department of Defense (DoD) and Defense Security Services (DSS) requirements for sanitizing unclassified data.
- Destruction of confidential and sensitive data in accordance with the National Institute of Standards and Technology (NIST.)
- Provides compliance under regulations such as FACTA, HIPAA, GLBA, PCI DSS, etc.
- Simple operation - just insert media into the drawer and push the start button!
- Internal software requires all parameters (capacitor voltage, switch, etc.) are present prior to the "Go" LED display. This software guarantees that each degauss cycle delivers sufficient strength and consistent performance.
- Will erase any magnetic media that fits into drawer including all standard hard drives (laptop, desktop and network) and storage tapes (DLT, LTO, DDS/DAT, etc.)
- No adapters required; maintenance free.
- Manufactured in the USA in ISO 9001 certified facilities.
- CE Certified and ships with the CE mark.
- Extremely compact and portable which allows it to fit easily into existing operations and be transported when necessary.

Made in the USA

Shown with optional deployment case with wheels
